

CERCLA & EPCRA RELEASE REPORTING

The reporter should be prepared when calling to report as much of the following information as possible: specific location of incident, date and time the incident occurred or was discovered, the name of material released, the source of the release, the cause of the release, the total quantity discharged, media affected, name of carrier or vessel, amount spilled into the water, actions taken on the scene, if evacuation has occurred, number of injuries, estimation of damage in dollar amounts, current and future cleanup actions, and other agencies notified or about to be notified. In addition to federal reporting requirements, the various states have requirements for the spiller to notify the state directly. The following are the reporting telephone numbers for the EPA Region VII:
